

The [WerkMaster](#)™ **Model 1800C—TITAN** expels the myth that bigger and heavier is better. The 380 pound **TITAN'S**

powerful 10 HP motor delivers more grinding power and performance than many of today's larger planetary grinders!

Incorporating **WerkMaster's** patent pending Octi-Disc™ Technology, the **TITAN** delivers results that today's professional commercial/residential/ maintenance contractor can only dream about. This is by far the most aggressive, powerful grinding machine in its weight class.

The TITAN devours concrete, VCT glue, mastic, rubber back carpet residue, thinset, epoxy, paint and any other surface material you may encounter. It grinds through spalled concrete and rained out slabs like a hot knife through butter!

Virtually eliminates edging as you can grind and edge to within **1/8" of the wall** and **under counter tops**

right back to the kick plate!

Use our **WerkMaster Dual Machine Ganging System** tying two machines together giving you **36" floor coverage** in one pass!

FEATURES

- Adjustable handle
- Dual action vacuum ports for dry, dust-free pick-up
- Wet or dry grinding.
- Internal tankless water feed mist system with needle valve flow control

OPTIONAL ACCESSORIES

- WerkMaster Dual Machine Ganging System
- WerkMaster ULTRA-Pulse Vacuum System
- Twist-lock, non-marking extension cords with 20A plugs (50, 75 and 100 feet).
- Multi-use pigtail plugs to plug into either the range or the dryer

SPECIFICATIONS

- 10 hp
- 30 breaker amps
- 1500 to 3500 rpm Disc Speed
- 380 lbs
- 5 3/4" Disc Size
- 18" Footprint
