

FOR IMMEDIATE RELEASE:

May 2009. WerkMaster partners with Onyx to bring propane powered “WerkMaster powered by Onyx” solutions to the marketplace.

Vancouver, BC, Canada – Werk Industries, manufacturer of the WerkMaster ULTRA Floor Systems superior line of hard surface grinders and polishers, has formed a joint-venture with Onyx Environmental Solutions to develop and market “WerkMaster powered by Onyx” solutions that are powered by Onyx’s proprietary propane engine systems. “WerkMaster powered by Onyx” equipment and solutions will be available throughout the United States thru Onyx’s nationwide sales and service network.

“WerkMaster is very excited about the new partnership which will ensure WerkMaster customers will receive the very best quality and most technically advanced propane delivery systems that exceed all state and government emission standards.” Stated Brian Wilson, President of Werk Industries.

WerkMaster Ultra Floor Systems are recognized throughout the world for their extreme productivity and ease of use. Introducing a propane option further increases productivity and eliminates the need for generators and cumbersome cords.

“The “WerkMaster powered by Onyx” joint-venture marries leading hard floor surfaces technology with the cleanest and most advanced propane engines delivering superior productivity and performance to flooring contractors” stated Lutz Hahne, President of Onyx Environmental Solutions.
