ONYX RX32

ONYX RX32

Engineered for deep-cleaning performance in large facilities, the RX32 features a heavy-duty dual-head

32-inch cleaning path and is powered by a robust 650W front drive motor. This design delivers the speed, strength, and reliability required in demanding environments. With a rugged cast aluminum cleaning head, best-in-class solution and recovery tank capacities, and a cleaning productivity rate of up to 56,000 square feet per hour, the **RX32** makes large-area **commercial floor care** faster, more efficient, and easier.

Marketing VP Stuart Proctor introduced the RX32, a "game-changer" 32-inch ride-on scrubber setting a new benchmark. It's engineered for superior productivity, effortless ease of use, rugged durability, and best-in-class specifications at a competitive price.

"The new RX32 represents a major leap forward in ride-on scrubber performance and value," said Stuart Proctor, Marketing VP. "We focused on improving productivity, ease of use, and durability—while delivering a best-in-class specification at a highly competitive price point."

### **Enhanced Cleaning Productivity**

The **RX32 Ride-On Floor Scrubber** incorporates several features designed to optimize operational efficiency and user experience:

- **Exceptional Maneuverability:** A 90-degree turning radius and variable drive speed deliver outstanding agility, even in tight or congested spaces.
- **LED Headlight:** Illuminates the cleaning path and work area for improved visibility and cleaning accuracy.
- **Superior Productivity:** Best-in-class solution and recovery tank capacities enable longer runtimes between refills and drains.
- **Intuitive Controls:** User-friendly control panel with clear button layout and real-time battery charge indicator simplifies operation.
- **Effortless Operation:** Simple drive and brake pedals with variable speed control enhance operator confidence and comfort.
- **Quick-Change Brush & Pad Drivers:** Easily swap brushes or pads to match different floor types and cleaning requirements.
- **Integrated Pressure Washing Gun:** Delivers 60 PSI for spot cleaning floors and rinsing the recovery tank.
- **On-Board Charger:** Convenient charging without the need for external equipment.
- **ECO Mode:** Extends runtime by reducing vacuum motor output when full power is not required.
- **Adjustable Head Pressure:** Easily selectable pressure settings optimize cleaning performance and battery efficiency.
- **Fast Drain System:** Large drain port enables rapid emptying of the recovery tank.
- **Floating Head Skirt:** Minimizes wall splatter while maintaining consistent cleaning performance.

## Versatile Application

The RX32 is compatible with a wide range of brushes and pads in varying stiffness levels, making it ideal for virtually any facility type. From hotels, hospitals, and schools to shopping malls, campuses, transit hubs, warehouses, distribution centers, and industrial complexes, the **RX32** delivers consistent results, high **cleaning productivity**, and dependable performance.

With the launch of the **RX32**, ONYX continues its commitment to delivering innovative, high-performance **floor care equipment** solutions that help facilities cleaners and building service contractors clean smarter, faster, and more efficiently.
